Seller's Property Disclosure – Residential

Notice to Licensee and seller: Only the Seller should fill out this form.

Notice to Seller: Florida law¹ requires a **Seller** of a home to disclose to the **Buyer** all known facts that materially affect the value of the property being sold and that are not readily observable or known by the **Buyer**. This disclosure form is designed to help you comply with the law. However, this disclosure form may not address every significant issue that is unique to the Property. You should think about what you would want to know if you were buying the Property today; and if you need more space for additional information, comments, or explanations, check the Paragraph 12 checkbox and attach an addendum.

Notice to Buyer: The following representations are made by **Seller** and **not** by any real estate licensee. This disclosure is not a guaranty or warranty of any kind. It is not a substitute for any inspections, warranties, or professional advice you may wish to obtain. It is not a substitute for your own personal judgment and common sense. The following information is based only upon **Seller's** actual knowledge of the Property's condition. **Sellers** can disclose only what they actually know. **Seller** may not know about all material or significant items. You should have an independent, professional home inspection to verify the condition of the Property and determine the cost of repairs, if any. This disclosure is not a contract and is not intended to be a part of any contract for sale and purchase.

Seller makes the following disclosure regarding the property described as: 3845	Iris a	S+ N	
Stretersburg, h 33703		(the "	Property")

ADDENDUM TO SELLER'S PROPERTY DISCLOSURE

3845 Iris St N Water intrusion issue As of October 2024

The family room at one time was a carport. A former owner enclosed it into a family room.

4 years ago, we noticed water coming from below into the family room. Standing in the room the leak is from the left-hand side. On the other side of this wall is a planter and then the driveway. Water came in to about 24" and then across that end of the room. As soon as rain stopped, water receded. We noticed that the driveway at that end was lower than the rest of the driveway.

We sealed the outside of the planter and driveway with a line of concrete in noticeable cracks.

It was dry until a heavy rainstorm about a month ago. Water started coming in again. We had a new gutter installed on the driveway side and all the length of the room. We had the planter and the driveway at that end filled with concrete.

During Helene a small amount of water came in: 24" x 12" square. As soon as wind and rain stopped, water receded

During Milton more water came in: 24" again and across the room. As soon as wind and rain stopped, water receded.

Helen W Igar 11/05/2024 04:57 PM
